CLEARING-HOUSE BANKS.

. THE BUSINESS OF THE WEEK

Clearings Compare Unfavorably with Those of Similar Dates Last Year.

Which Is Attributed to the Unsettled Condition of Affairs Caused by the Strike-Wheat Easier, Corn Firm and Cats Quiet.

MONEY AND STOCKS.

Clearings for the Day and Week Compared with Those of Same Periods in 1891. The clearings yesterday were \$581,336.84; balances, \$42,757.54. For the week the clearings were \$3,623,826,32; balances, \$301,-116.21. On the corresponding day in 1891 the clearings were \$612,190.56, and the balances \$65,904.19. For the week the clearings were \$3,960,065.96, or more than \$300,000 greater than in the corresponding week in 1892, the smaller volume being due to the street-car strike, which has greatly inter-

NEW YORK QUOTATIONS. At New York, Saturday, money on call was easy with no loans, closing offered at 2 per cent.

fered with commercial transactions.

Prime mercantile paper, 4254 per cent. Sterling exchange was quiet but steady at \$4.8514 for sixty-day bilis and \$4.874 for

demand. The total sales of stocks were 390,000 shares, including the following: Atchison, 8,659; Canada Southern, 14,068; Delaware. Lackawanna & Western, 912; Erie, 1,110; Lake Shore, 20,657; Louisville & Nashville, 5.000; Michigan Central, 5,145; Missouri Pacific, 5,767; Northwestern, 30,986; New York Central, 18,982; New England, 30,340; Reading, 47,950; Richmond & West Point, 27,248;

St. Paul. 47.600; St. Paul & Omaha, 6,590; Western Union, 3,575. The stock market, Saturday, again gave indubitable evidence that the moving power behind the situation is only manipulation, and, while the strength of the whole list was very decided in the first hour, a complete and demoralizing change occurred at 11 o'clock and the most positive weakness marked the trading on the exchange for the last hour of the session. There were two principal causes advanced for this sudden change of temper, one being the old rule revived of the death of Mr. Gould and the other was the appointment of a receiver for the Georgia Central railroad. The former, however, was quickly denied, while the latter was known before the opening of the session and seemed to have no weight during the first bour. There was, besides, a bank statement which showed a large decrease in cash despite a moderate increase in deposits, and a heavy expansion of loans caused a reduction in the surplus reserve of over \$5,-000,000. This undoubtedly had some influence, but the downward movement was in full swing long before the issue of the statement. The market opened with a firm temper and the whole list, with the exception of the Richmond & West Point securities and the New England, scored further improvement in the first hour, there being up to that time no interruption to the advance. The Vanderbilts were still the strong feature and Lake Shore rose rapidly from 136 s to 140 4. Michigan Central did more than keep pace with it with a rise from 111% to 119 on a much emailer business. All the other stocks of this group felt the stimulus and Northwestern and New York Central made material gains, selling up to the highest points for the week. Up to this time the concessions in everything but the Richmond & West Points were insignificant, but that stock opened down

14 and retired 1 per cent. further, while the preferred, after opening down 34, at 68, further dropped to 64. In the face of the weakness in the rest of the list it ralhed to 67, but closed at 65. The general list quickly ran off in the last hour, and realizations and heavy short selling, together with the execution of some stop orders, accelerated the decline. Lake Shore dropped from 14014 to 13514; Northwestern, from 1211/2 to 119; Reading, from 5818 to 5578; Lackawanna, from 163% to and Delaware & Hudson from 140% to 13612, while the entire list was brought No. 1, 50@55c; do., extra, 60@65c. down below the level of the opening figures. The early advances were lost in all cases, and in many additional fractions. The onslaught was kept up to the close, and the market finished weak at the lowest prices of the day. Michigan Central was the only stock which held on to any portion of its advance, and it was 51's per cent. higher Saturday night, at 119, though the bid for it at the close was materially below that figure. The losses, however, included Lackawanna and Delaware & Hudson, each 3 per cent.; Richmond & West Point 2, the preferred 634; Reading, 178, and Railroad bonds were also fairly active.

New England and Missouri Pacific, each 14. but there was no excitement as in stocks. though the Reading issues and those of the Richmond & West Point system were specially active and weak. The rest of the list, however, displayed a firm temper until the break came, when prices receded in sympathy. The total was \$1,127,000, of which Richmond & West Point fives furnished \$296,000, Reading thirds, \$129,000, and the deferreds \$115,000. The advances were few in number, but Syracuse, Binghamton & New York firsts rose 218, to 1314; Louisville & Nashville fives to 105, and Missouri Pacific seconds to 107. Reading convertibles lost 412, to 5512. Government bonds were dull and steady.

State bonds were dull and firm. Closing

ABOUT WRINKLES.

French and American Specialists Differ as to Treatment by Hot Steam.

Wrinkles are the index of nervous condition. Upright lines between the eyes inget them from living and sleeping in close,

The latest scientific writer on the subject their sensitiveness to the air, which, noxious or pure, is our chief nutriment, muscles lose their tone, the tissue of the face shrink, and these shrinkages become wrinkles. At first they are fugitive; a week's watching may write the face over with cross-batching of fine lines, amd another week of rest will restore lost tissue, fat and fluids to fill the spaces and smooth the face again.

To avert wrinkles the nervous and overtaxed must rest and eat nourishing food. The neuralgic should eat roast fat and make food tempting with condiments. adding to their fare the sound, coarse | receipts of oats, than expected, prices held bread which contains phosphate to feed their starved nerves, and is the great regulator of nutritive func-tion. Too often the trouble is not so much Leanness and wrinkles go together. We seldom see a florid, plethoric woman with them, as the supply of blood keeps the skin

in repair. Steaming the face is the fashionable treatment to remove wrinkles, but it is an dea of American adoption, if not original. French specialists deprecate steaming. They say that it makes wrinkles worse when the practice is suspended, and assert that it causes falling of eyelashes and eyebrows. The intensely hot steaming | w may have that effect in certain states of the blood, and it must cause deterioration of blood to the face, which is far from healthy. The remedy is to use va-por at milder heat, keeping up the process longer at a time. Half an hour over the vapor, however, is more time than most women can spend. The most convenient application is a firm waxen paste which takes time for rubbing out and gives ust the right amount of massage for the face in the process. The soft, oily salves and creams in request are not such good wrinkle-erasers as a firm, protective cosmetic which will not rub off easily, but al-

lows the moisture of the skin to remain and freshen the tissues. It is easier to disperse wrinkles than to eradicate any other defect of the face. Sleep, much more than people suppose necessary, rather hearty food, and moister air in houses, are indispensable to keeping a smooth face, whatever cosmetic is used, and a toilet paste, or cream has twice the effect in less time if the bygiene of the

complexion be observed. Massage of the face should be by a firm leisurely stroke, just enough not to irritate. The best usage makes the movement in circular sweeps over the wrinkles, not lifting the fingers much until one has finished on that particular line. Masabout the eyes and baggy evelids, observe the precauti on never to sleep after a dance or late hours without bathing the face plentiful in very warm water and taking a few spoonfuls of something light, half a cup of chocolate, or hot bouillion, eau sucre, rich and syrnpy, or a lemonade, with or without afresh beaten egg. Three spoon fuls of such refreshment will take off th horrible exhaustion which presents its accounts on waking. A cup of hot water with one drop oil of cinnamon is a famons restorative, especially in heart weakness, after late hours.

HEREDITY AND ENVIRONMENT.

The Superintendent of the Five Points House of Industry Gives His Views on the Subject. Wm. F. Barnard, in the Independent. I am not prepared to say that I believe in are vicious their child will be the same.

the theory of immediate heredity. I do not think that it necessarily follows that because a father or mother, or both can give proof to the contrary, at least to my own satisfaction. We have had in this home children who were just as bright, gentle, well-behaved and intelligent as any children I have ever seen, and the parents of those children, respectively, were as wretched and miserable as have ever lived on the face of the earth. I recall a child who came from the slums

in Baxter street, whose father spent a good part of his time on Blackwell's island because of crime, and that he was a drunkard goes without saying. The mother was as bad as the father, and yet the child-a girl-was as delicate and sensitive a child as I have ever seen. When she came to this institution she responded at once to the better surroundings in which she found herself placed. What became of her? She is now C. 3 8 @4 sc; good yellows, 34 @3 sc; fair | the wife of a highly respectable physician of this city, and has a family of bright and beautiful children. Now, if according to the modern philosphers, we say wickedness is hereditary, the mother of these levely children should have been a bad woman. We have two girls in the Five Points House of Industry to-day whose mother was as bad a woman as you would find in the town; she was not only intemperate, but immoral. She died on Blackwell's Island. I will place those children alongside of any children in the city, no matter how well brought up, for intelligence and ap-

preciation of all the decencies and nicer phases of life. I claim that even if the immediate relatives were bad there have been some good people back somewhere, whether you go back one, two or three generations. If I believed in the so-called law of heredity as it has been explained by some modern writers-that because a parent is bad it necessarily follows that the descendants will be bad - I would feel inclined to give up philanthropic work in despair. It is very unjust to say that because a father and mother are bad their children must necessarily follow in their footsteps. That has about it too much of the old world ring of caste; of the days when, if you were born in the artisan class, you must make up your mind always to remain there; you must not consider yourself as having a right to belong | pickled bellies, 64c; pickled shoulders, 5@ | and bridge-building and repairing upon | any where else.

GREAT DAY FOR BEARS

After Waiting a Fortnight Pardridge Is Able to Rake in Enormous Profits.

The Bottom Apparently Drops Out of the Wheat Market and a Break to 8914c Occurs, with the Close Weak at 893sc.

TRADING AT CHICAGO. Speculators Receive a Hint that the Pits

Are Being Manipulated. CHICAGO, March 5 .- There was a decidedly bearish feeling in wheat during most of the session, and lower prices ruled. The news presented a sharp contrast with that which was given out so freely yesterday morning. The bulls hardly got a single item in their favor, and the suspicion started yesterday that the trade had been cleverly deceived by manufactured news was strengthened. Foreigners, who were represented as buying so Vigorously yesterday, and the damage to crops which they represented as being so alarming, were scarcely mentioned to-day. On the contrary, dullness seemed to prevail everywhere. Amid so much that was bearish it was difficult to say what was the most depressing. but the meager exports from the seaboard for the week-only 2,908,000 bushels, being less than for a long time-was very discouraging. The fact that no wheat was cleared from the seaboard yesterday was another bearish item. A published report on the condition of the winter-wheat crop, the continued free movement in the Northwest and the lower cables were likewise weakening in their tendency. With this news it did not take long for the crowd to get on the bear side with unusual unanimity. Longs saw all their hopes of a profit shattered and

made haste to soll, and the bears, taking new courage, assisted in the decline by selling freely. There was very little disposition to buy until there had been a dedicate mental trouble, thought, care, or | cided recession in prices, and even then temper more than physical illness. Fine it was mostly in the way of netted lines about the eyes denote nervous | covering by shorts, who had good profits in sight. Pardridge was a buyer and covlows overstimulus. Women are likely to | ered a big line of wheat, which he has been selling all the way from 91c up to 95c, and then down again from 95c to 90c. The last two weeks must have brought the great says the air in our rooms should be changed plunger very big winnings. New Yorkers, three times every hour. The skin owes its led by Cottrell, were heavy sellers from the beauty to the nerves which control the fine | start. The weakness continued throughinvisible blood vessels of the surface, whose | out the session, with no noticeable reaction, work lends glow and transparency to and closed weak and only slightly above the face. The nerves in turn owe the bottom figures of the day at a loss of over 1c compared with yesterday. May opened %c lower at 90 %c, sold at 90 4c, inhaled by gallons hourly. When the worked off to 89%c, firmed up to 89%c, nerves are deadened by close air, the fine broke to 89%c, and closed weak at 89%c.

Corn was quiet and easy. The receipts were a trifle in excess of the estimates and contained sixteen cars of contract. Trade was slow and this, with the weakness in the wheat pit and the slackness of the cash demand, were the depressing influences. Transactions, however, were confined to a range of &c, and the close was &c lower than that of yesterday. Oats were dull and easy. The market was featureless. Considering the weakness

very well, closing with 40 loss. Hog products were quiet and rather easy. the opening was a little firmer on the fact that the receipts of hogs were 6,000 less what people eat, but what they don't eat than expected and prices at the yards 50 and do not get provided for them at table. 10c higher. But there was little inquiry than expected and prices at the yards 5@ and the firmness soon disappeared. There was some recovery near the end, and the close shows pork unchanged, with lard and ribs .05c higher.

in wheat, the duliness in corn and larger

Estimated receipts for Monday are: Wheat, 173 cars; corn, 205 cars; oats, 127 cars; hogs, 27,000 head, and 130,000 head for the

Fads and Foibles of Fashion Death to Time-Keepers. Chicago Tribune. The swagger young woman these days wears her watch on the shoulder, just in front of the arm, dangling in the air, ready for every pick-pocket in New York. "It makes me cry, almost," said a jeweler,

"to think how women abuse watches." "What do they do with them?" "Ask me something easier," he went on, or, rather, ask what do they not do with their watches. In the first place, a watch is an extremely sensitive bit of mechanism. intensely alive to the action of the temperature. Every variation from heat to cold. and vice versa, leaves its mark on a watch. Even with the best of care, a watch will vary in accuracy to a considerable extent. Then what may be expected of a watch which a woman uses as she would a bit of ribbon, or a bangle, or other toy! No woman who carries her watch exposed in the manner indicated by the above demand of fashion need hope to have her time-piece keep any sort of accuracy. It is simply impossible. Every cold blast that strikes the watch alters it in some degree, and makes it less

valuable as a time-keeper. "Women are very severe in their treatment of watches. Perhaps not intentionally so, still so in effect. Even the pockets in which they carry their watches are so contrived and are of materials of such true, to the best of my knowledge and belief.

WM. P. GALLUP, President.

Subscribed and sworn to before me, this 5th day varying durability that their time-pieces under almost any conditions are soon out of order. It is a heavy dress to-day and a light one to-morrow, and the watch must suffer the consequences. "If you will look over the rack of the workers in the repair department of any

large jewelry-house you will find that the greater percentage of watches there for mending belong to women. "Another reason why I dislike the present fad is because, to my mind, it reacts on the jewelers. It is like this: A woman will get a watch. Soon it begins to act badly. She comes back. She complains. We try to fix the watch. In a few weeks it is as worthless as ever. Then she blames the trade for selling her a shabby watch. I tell you it does not pay."

"Then women are more severe on watches than are men!" "By all odds, yes. And do you know what, in a large degree, is responsible for this abuse?

I would have each State by a legislative

"The fads and foibles of fashion." How Our Roads May Be Improved. Cot. A. A. Pope, in March Forum.

25/2c; yellow, 28c. Tallow quiet and easy; enactment do at once two or three things in the direction of this movement, viz.: procure and disseminate imformation by establishing a bureau where the facts relating to the expense, mechanical construction, care, durability, use and extent of the different kinds of roads shall be known and ascertained; then I would have some kind of State supervision and advisory assistance by a competent engineer or engineers appointed by the State in aid of roads |

of March, 1892.

Correct-Attest:

sive and economical plan for the whole State; thirdly, I would have the State either own or control and maintain some through highways, connecting the princi-pal towns in the State, and connecting these with the principal towns of neighboring States, where they are most needed. either for great public exigencies or for the greatest general use. The State would thus promote the equalization and the general reduction of expense of construction and maintenance of these main roads, and would give a profitable example and a strong incentive to the adjacent towns to construct better contributory roads as feeders to the main ones. I would have the State divide the expenses of this scheme of road betterment in the tax levy, so that part of it should be apportioned to the whole State, part to the counties through which the road ran, and part to the towns. And, further, I would have this tax levy kept small and the investment adequate and quickly made by the business man's method of borrowing the money on long loans. It would thus be easily paid
